# Gas Controller DGC

## Monitoring of up to 128 digital and analogue gas sensors

MSR ELECTRONIC

Gas Detection.

Digital-Gas-Controller DGC – robust, reliable and certified for safety-critical areas. Maximum efficiency and safety in all applications.

## Benefits

- **Future-proof for a wide range of applications**
- **Maximum flexibility**
- **Versatile integration** into plant and building automation systems
- **Monitoring of up to 128 digital and analogue gas sensors** in a centralised solution
- **Combines gas monitoring, warning and plant control** in a high-performance system
- **Detective of toxic and combustible gases, vapours and refrigerants** in garages, tunnels, refrigeration systems and many other applications
- **With up to 128 relays and 16 analogue outputs**
- **Complies with EN 50545-1** and can be optionally expanded with a data logger, UPS and communication modules
